Scientific title
The effect of supportive counseling on self-esteem and self-efficacy of infertile women after IVF failure

Public title
The effect of supportive counseling on self-esteem and self-efficacy of infertile women after IVF failure

Purpose
Education/Guidance

Inclusion/Exclusion criteria

Inclusion criteria:
Diagnosis of primary infertility Negative pregnancy test following failure of the first IVf Iranian and resident of Mashhad ability to speak and write in Persian No known medical conditions do not smoke or drink alcohol Has a smartphone or any electronic device with the ability to connect to the Internet Satisfaction to participate in the study Do not have a mental illness

Exclusion criteria:
Occurrence of stressful events during the study Not attending one of the counseling sessions, participating in other training and counseling sessions while studying

Age
No age limit

Gender
Female

Phase
N/A

Groups that have been masked
No information

Sample size
Target sample size: **70**

Randomization (investigator's opinion)
Randomized

Randomization description
Randomization method: simple randomization Randomization tool: statistical software(Random allocation software) How to make a random sequence: They are selected as available and are randomly placed in each of the groups using a simple random sequence. Hide allocation: using randomly sealed opaque envelopes with random sequence

Blinding (investigator's opinion)
Not blinded

Blinding description

Placebo
Not used

Assignment
Parallel

Other design features
This analysis is only performed on patients who have completed all stages of counseling correctly - generalizing the results to the community should be done with caution.
