Title and more details about the data/document
the data will be the result of the observational checklist that measure the prevention complication of stroke for patient.

When the data will become available and for how long
Once the process of data collection, analysis, and successful publishing of the manuscript, all the related files will become available

To whom data/document is available
which academic nurse and any researcher who is interested in the data

Under which criteria data/document could be used
The data could be used after getting the permission via email. Also, users need to acknowledge the owner.

From where data/document is obtainable
Users can ask for the data and permission via email at khadija.saeed2202p@conursing.uobaghdad.edu.iq

What processes are involved for a request to access data/document
preparing a summary report of the research findings, highlighting the key outcomes, conclusion, and recommendation.
