Investigating the effect of spiritual care based on Sound-Heart model on Pain, Fatigue and life expectancy of hemodialysis patients

Protocol summary

Study aim

Investigating the effect of spiritual care based on Sound-Heart model on pain, fatigue and life expectancy of hemodialysis patients referred to the hemodialysis center of Ostad Motahari Jahrom Hospital in 2024

Design

A clinical trial with a control group, parallel groups, and randomized block design was conducted on 68 patients. Randomization was carried out using the Random Allocation Software.There is no blindness in this study.

Settings and conduct

This study will be conducted at the Hemodialysis Center of Ostad Motahari Hospital in Jahrom. Each patient will receive six in-person sessions of spiritual care, with two sessions per week.

Participants/Inclusion and exclusion criteria

Inclusion Criteria: Having a weekly hemodialysis schedule, having been on hemodialysis for at least one year, no history of previous kidney transplantation, aged between 18 and 80 years, Muslim, full awareness of time, place, and person, not deaf to ensure effective communication, physical and mental readiness to answer questions, and no history of mental illness or use of psychiatric medications. exclusion criteria :occurrence of a crisis event affecting the patient after the start of the research, the patient's unwillingness to continue participating in the study, hospitalization due to disease relapse or transplantation, and death of the patient during the course of the study.

Intervention groups

In the intervention group, spiritual care will be provided based on the Salim Heart Model. Patients will receive spiritual care in addition to their regular care and during dialysis. The spiritual care will be based on religious spirituality and will focus on improving four relationships of human beings: relationship with God, relationship with oneself, relationship with others, and relationship with the environment.Control group: will receive routine care

Main outcome variables

Pain, Fatigue and Life Expectancy

Sample size
Target sample size: **68**

Randomization (investigator's opinion)
Randomized

Randomization description
Patients undergoing hemodialysis will be included in the study using a convenience sampling method. Once the number of participants is determined, they will be allocated into intervention and control groups using block randomization. Specifically, 17 blocks of 4 will be used for this purpose, with random allocation managed through the Random Allocation Software version 2.

Blinding (investigator's opinion)

Description of health condition studied
Hemodialysis patients

ICD-10 code
Z49

ICD-10 code description
Encounter for care involving renal dialysis

Primary outcomes

1

Description
Fatigue

Timepoint
Before the intervention , immediately after the intervention, and one month after the intervention.

Method of measurement
Multidimensional Fatigue Inventory (Mfi)

2

Description
Pain

Timepoint
Before the intervention , immediately after the intervention, and one month after the intervention

Method of measurement
Numeric Pain Rating Scale (Nprs)

Secondary outcomes

1

Description
Life Expectancy

Timepoint

Before the intervention , immediately after the intervention, and one month after the intervention

Method of measurement

Snyder Life Expectancy Questionnaire

Intervention groups

1

Description

Intervention Group: Spiritual care will be provided based on the Salim Heart Model. In addition to their usual care and during dialysis, patients will receive this spiritual care. The spiritual care will be based on religious spirituality and will focus on improving the four key relationships of the individual: relationship with God, relationship with oneself, relationship with others, and relationship with the environment. Each patient will receive six sessions of spiritual care (totaling 68 sessions), conducted twice a week on hemodialysis days, between 8 AM to 12 PM or 2 PM to 6 PM.

Sharing plan

Deidentified Individual Participant Data Set (IPD)
No - There is not a plan to make this available

Justification/reason for indecision/not sharing IPD
Due to the privacy of the subjects these items are not shared.

Study Protocol
Yes - There is a plan to make this available

Statistical Analysis Plan
Yes - There is a plan to make this available

Informed Consent Form
Yes - There is a plan to make this available

Clinical Study Report
Undecided - It is not yet known if there will be a plan to make this available

Analytic Code
Undecided - It is not yet known if there will be a plan to make this available

Data Dictionary
No - There is not a plan to make this available

Title and more details about the data/document
The data that are going to be available will be discussed in chapters four and five of the thesis and finally a brief explanation of them will be given in the article extracted from thesis.

When the data will become available and for how long
The access period starts 6 months after the results are published.

To whom data/document is available
access for researchers working in academic and scientific institutions.

Under which criteria data/document could be used
To publish articles and scientific references

From where data/document is obtainable
Jahrom University of Medical Sciences, Dr. Zohra Badiyepeyma Jahrom.

What processes are involved for a request to access data/document
In order to obtain the required data, dear researchers can send an email to Dr. Zohra Badiye Peyma at z.badiyepeyma@gmail.com, which will be answered within 14 days.
