Comparing the lilt voice of Quran with normal situation, silence, and lullaby music on physiological responses and behavioral measures of premature infant discharged from neonatal intensive care unit

Protocol summary

Summary

Objective: this research planed to compare the effects of holly Quran recitation, with normal situation, silence and lullaby music on physiological responses and behavioral measures of premature infants. Design: a double blind randomized controlled trial will conducted to compair the effects of holly Quran recitation, normal situation, silence, and lullaby music on preterm newborns. All preterm newborns will randomly allocated to either the experimental or control group. Procedure: 120 premature infants who have inclusion criteria of this study, will randomly allocated in four groups: holly Quran recitation, silence, lullaby music and control groups. They will be observed for four dependent variables; oxygen saturation levels, heart rate, respiration rate and behavioral state. Interventions include; 20 minutes Holly Quran recitation (verse 7-23 of Yusuf Quranic chapters, by Shahhat Mohammad Anvar sound) and lullaby music(good night little, the sound of the Islamic Republic of Iran Radio) that will played via headphone with volume range 50-60 dB. Headphone with no sound will be used for silence group. Any group will be observed for physiological responses and behavioral state from 10 minutes before to 30 minutes after intervention and recorded numerous at 5,10 minutes before and 5, 10, 15, 20, 25 and 30 minutes after beginning of intervention, will be used to analysis.

Scientific title

Comparing the lilt voice of Quran with normal situation, silence, and lullaby music on physiological responses and behavioral measures of premature infant discharged from neonatal intensive care unit

Public title

Comparing the lilt voice of Quran with normal situation,

silence, and lullaby music on physiological responses and behavioral measures of premature infant

Purpose
Supportive

Inclusion/Exclusion criteria
Inclusion criteria: 1- Gestational age 28 to 37 weeks 2- Appropriate-for-gestational-age (AGA) 3- APGAR scores from 7 to 10 at one and five minutes after birth 4- Hearing confirmed by OAE 5- Iranian neonate 6- Nutrition by mother milk 7- No current phototherapy 8- No morbidities such as congenital defects, intraventricular hemorrhage (IVH), necrotizing enterocolitis (NEC), sepsis, acute lung disease or neonatal anemia and any acute illness 9- No undergoing mechanical ventilation 10- No receiving sedation medications such as Phenobarbital 11- No documentation of hyper responsiveness to the sound and 12- No history of maternal drug abuse, including alcohol or illegal substances. Only infants, who are clinically stable and physically able to tolerate the stimuli will be included. Exclusion criterias: signs of hyper responsiveness to the sound such as hiccup, facial grimace, finger splay, clenched fingers, crying, vomiting, and heart rate over 200; oxygen saturation lower than 80 and any need to handling.

Intervention groups

1

Description
4- Control group: natural situation: neonates in this group will recive no intervention and only will observed for dependent variables for 40 minutes
Category
Treatment - Other

2

Description
1- Holly Quran recitation group:the intervention in this group will include 20 minutes recitation of Yusuf Quranic chapters, verse 7-23, by Shahhat Mohammad Anvar sound that will played via headphone by volume range 50-60 dB
Category
Treatment - Other

3

Description
3- Silence gruop: headphone with no sound will placed on their ear for 20 minutes
Category
Treatment - Other

4

Description
2- Lullaby music group: lullaby music (good night little, the work of the Islamic Republic of Iran radio) include 20 minutes music, will played via headphone by volume range 50-60 dB for this group
Category
Treatment - Other
